Organizational framework (www. bhadaleit.com)

Purpose: The main aim for a framework is to abstract the underlying services and other offers. This is also to enable better line of communications across divisions, departments and services. This is neither an org structure nor a fixed set of entities, however is dynamic and based on the enterprise needs. Below is the high level flow chart that enables to tie up all the enterprise assets, the processes and resources. ERP is a subset of the Org framework.

Organizational framework - has	
Org module 1 (Service module)	Org module 2 (Product module)

Each module has unique offer	
Offer 1- Org Service 1	Offer 2: Org Product 1

Each service/product has	
Procedures	Processes

Each Procedure/Process has	
Steps	Details

Each Step generates	
Result	Data

Raw Results are		
Verified	Validated	Generates Optimized Results

Optimized Results are	
Tested	Generates UAT

UAT results are		
Confirmatory tested	Environment integration	Moved to Operations

Operations offer			
Monitoring	Maintenance	Reengage	Rework
